PROVIDER USER GUIDE

# Managing Patient Medications in the Greenway Health Mobile App

*How to start, refill, and stop a patient medication*

## About this guide

This guide shows providers and clinical staff how to manage patient medications in the Greenway Health mobile application. Use it to start a new medication, refill an existing prescription, or discontinue a medication that a patient no longer needs.

### Who should use this guide

Prescribers, nurses, and clinical support staff who have an active Greenway Health account or site access.

### Before you begin

- Confirm that you have a Greenway Health Site ID, or use Demo Mode if you're evaluating the app as a guest.
- Have the patient's full name and date of birth ready to search their record.
- For refills, know which medication you're refilling and the preferred pharmacy details (city, state, and ZIP code).

**Note:** All patient health information displayed in the Greenway Health app is confidential. Follow your organization's HIPAA policies when accessing or discussing patient records.

## Task 1: Sign in to Greenway Health

Complete these steps each time you start a new session.

1. Open a browser and go to *mobile.greenwayhealth.com*.

*Figure 1. The Greenway Health sign-in address bar.*

1. Choose one of the following sign-in methods:

- **Guest access** — Select **Demo Mode** (shown in yellow).
- Site access — Enter your **Site ID** and select Done.

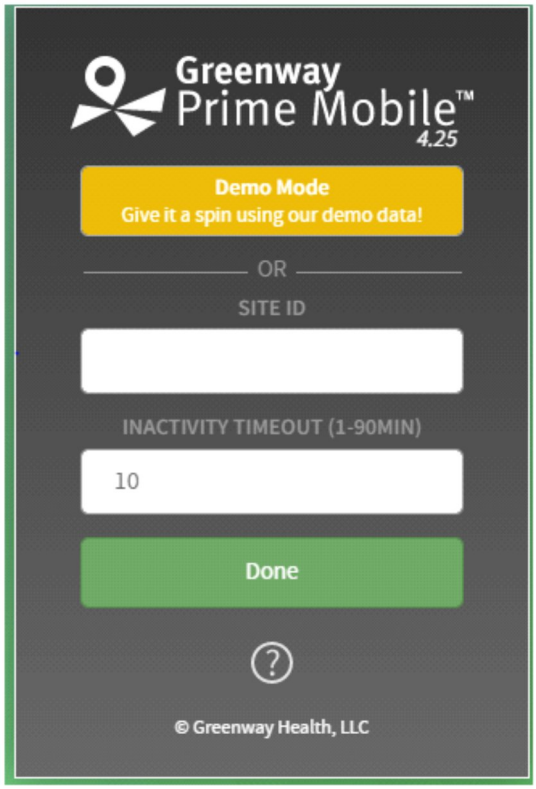

*Figure 2. Greenway Health sign-in screen showing the Demo Mode button and Site ID field.*

**Result:** Greenway Health opens to the dashboard, showing the patient search bar and recent activity.

## Task 2: Start a new medication

Use this task to record a non-prescription medication or a new prescription in a patient's record.

1. On the dashboard, select the **Patients** tab.

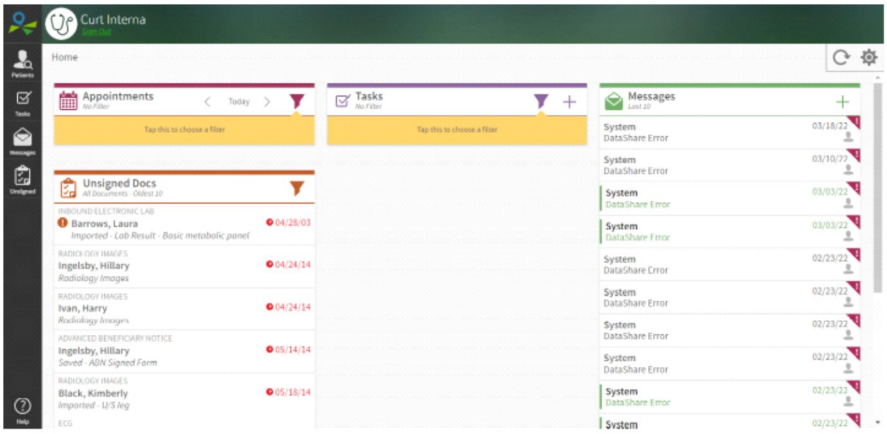

*Figure 3. Greenway Health dashboard with Appointments, Tasks, and Messages panels.*

1. Enter the patient's name, then select the matching record.

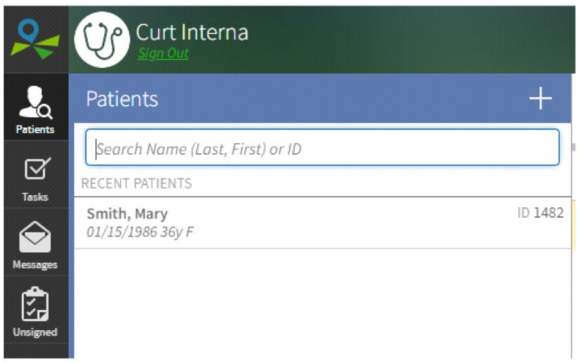

*Figure 4. Patients search screen with name search field and recent patients.*

**Result:** The patient's electronic health record (EHR) opens, showing prescribed medications, allergies, medical and surgical history, appointments, and family history.

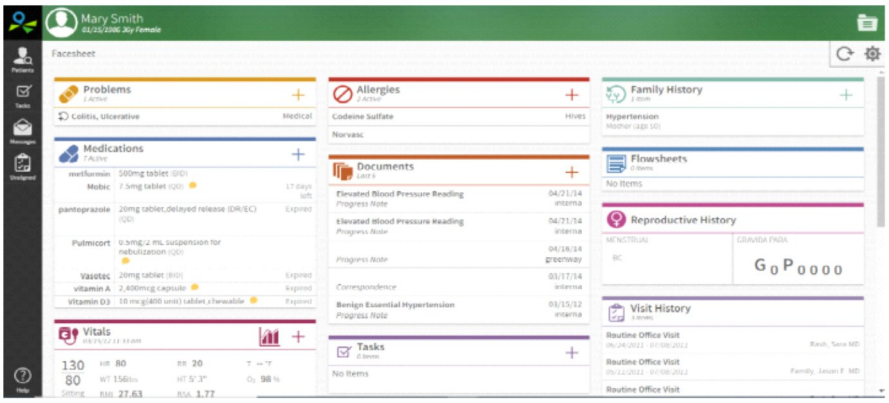

*Figure 5. Patient facesheet showing Medications, Allergies, Family History, and related panels.*

1. Select the **Medication** tab, then select **+** to add a medication.
2. Select **Record** to add a non-prescription medication. To add a prescription instead, select **Prescribe**.

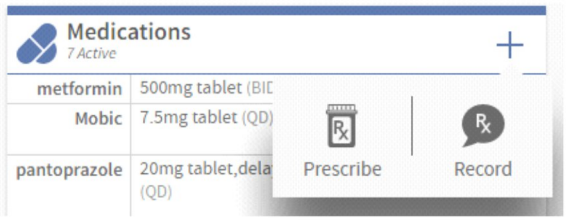

*Figure 6. Medication menu with Prescribe and Record options.*

1. Enter the medication details:

- Indication
- Medication name
- SIG (dosage instructions)
- Duration
- Prescriber name
- Relevant illness history

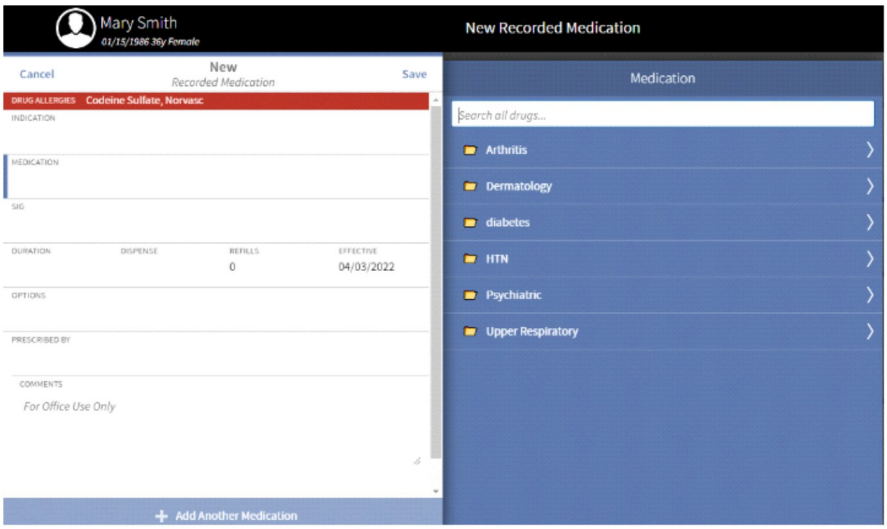

*Figure 7. New Recorded Medication form with Indication, Medication, SIG, and Duration fields.*

1. Select **Save** to add the medication to the patient's record.

**Result:** The medication appears in the patient's active medication list.

## Task 3: Refill a medication

Use this task to refill a medication that's already in the patient's record.

1. Sign in to *mobile.greenwayhealth.com*, then enter the patient's first name, last name, and date of birth.

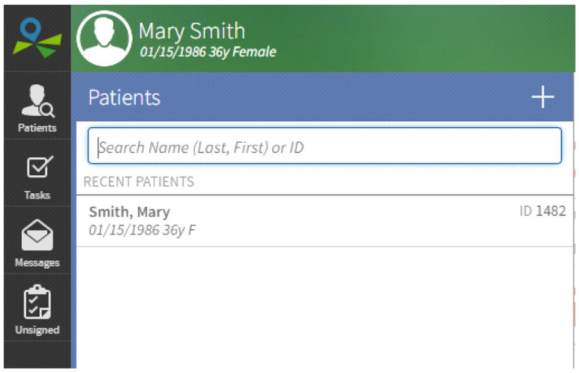

*Figure 8. Patients search screen with a matched patient record.*

1. Select the matching patient record.

**Result:** The patient dashboard opens, showing current medications, ailment history, and vaccination records.

1. In the medication list, select the medication you want to refill. For example, to refill metformin, select **metformin**.

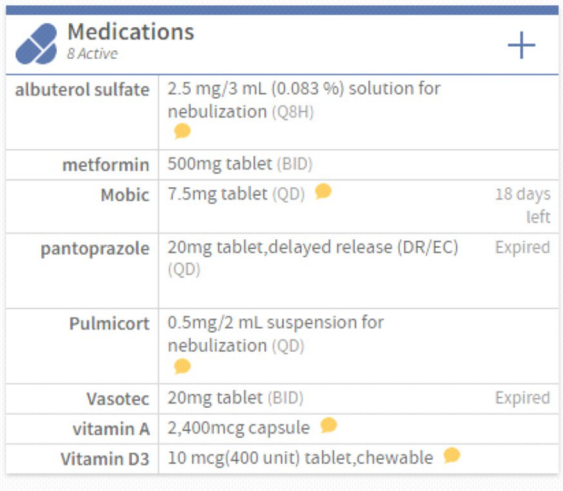

*Figure 9. Medications panel with metformin listed among active medications.*

1. On the medication detail page, select **Refill**.

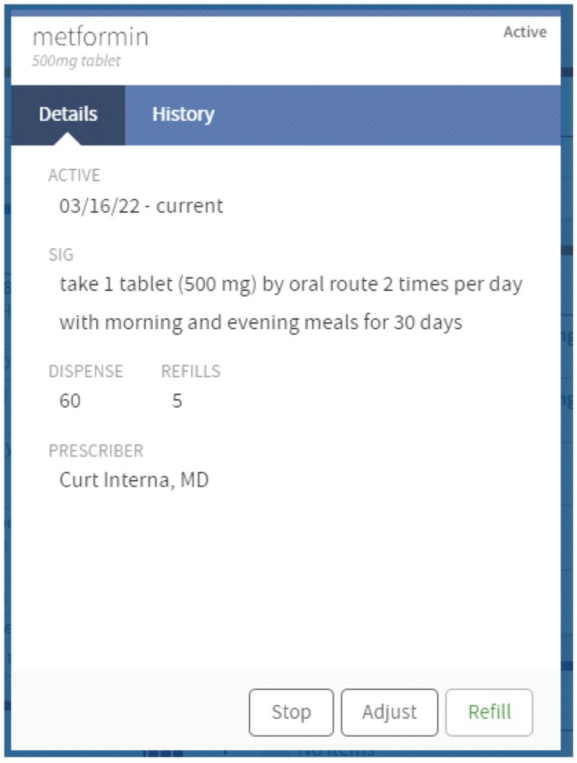

*Figure 10. Metformin detail page with Stop, Adjust, and Refill buttons.*

**Result:** The refill page opens, showing the current duration, dispense quantity, number of refills remaining, and the effective-to-estimated date range.

1. Confirm or update the **duration**, **dispense quantity**, and number of **refills**, then select **Next**.

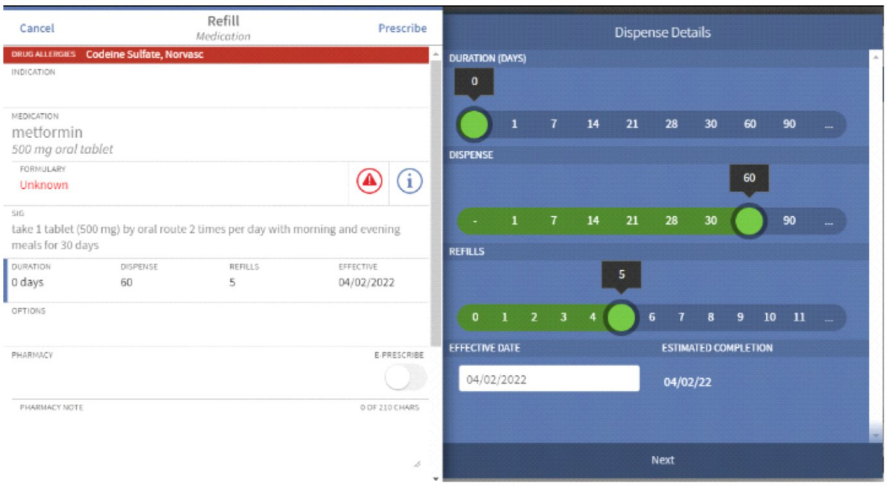

*Figure 11. Refill page with Duration, Dispense, and Refills sliders and effective date.*

1. Search for the patient's preferred pharmacy by city, state, and ZIP code, then select it from the results.

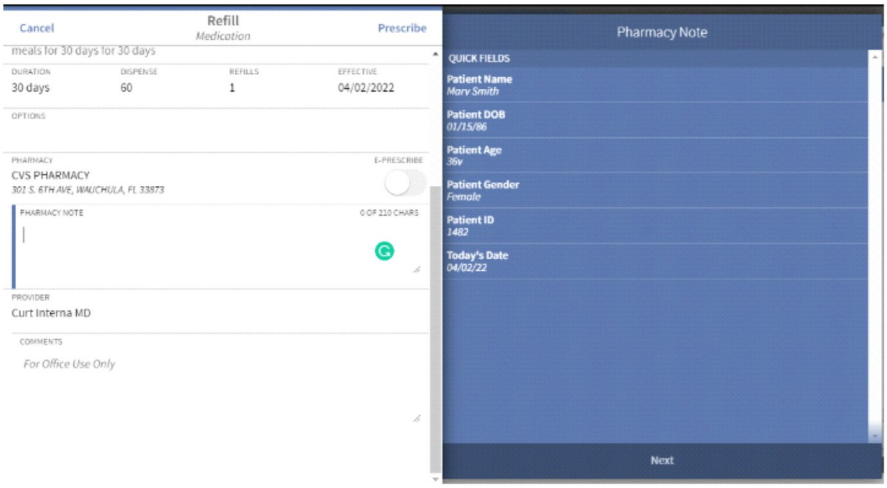

*Figure 12. Refill page with pharmacy selected and Pharmacy Note quick fields.*

1. Select the prescribing **Provider ID**, then select **Complete Refill**.

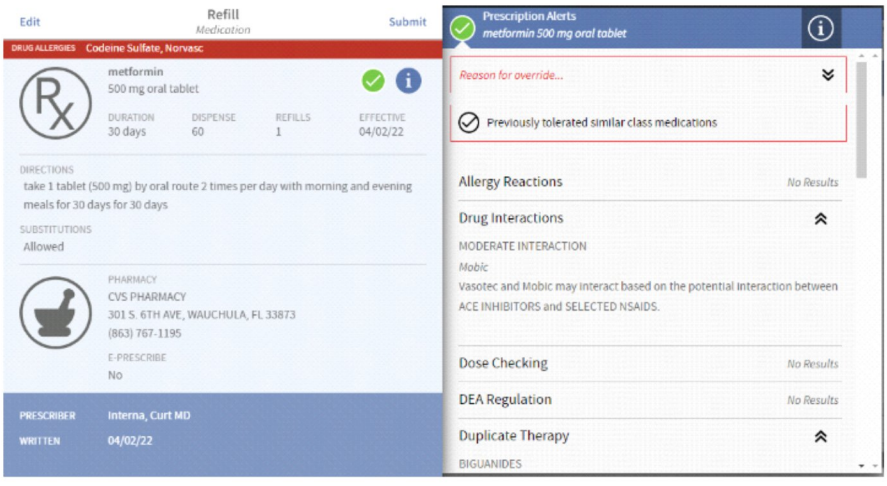

*Figure 13. Final refill review showing prescription alerts and drug interaction checks.*

**Result:** The refill is sent to the selected pharmacy, and the patient's medication record updates with the new refill date.

## Task 4: Stop a medication

Use this task to discontinue a medication that a patient no longer needs.

1. In the patient's record, select the **Medication** tab.

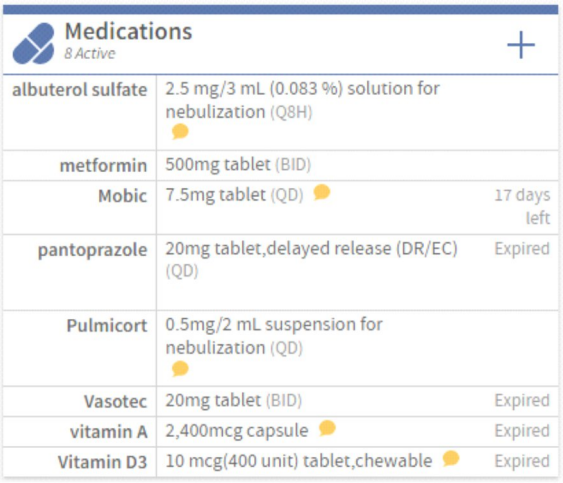

*Figure 14. Medications panel listing the patient's active medications.*

1. Select the medication you want to stop, then select **Stop**.

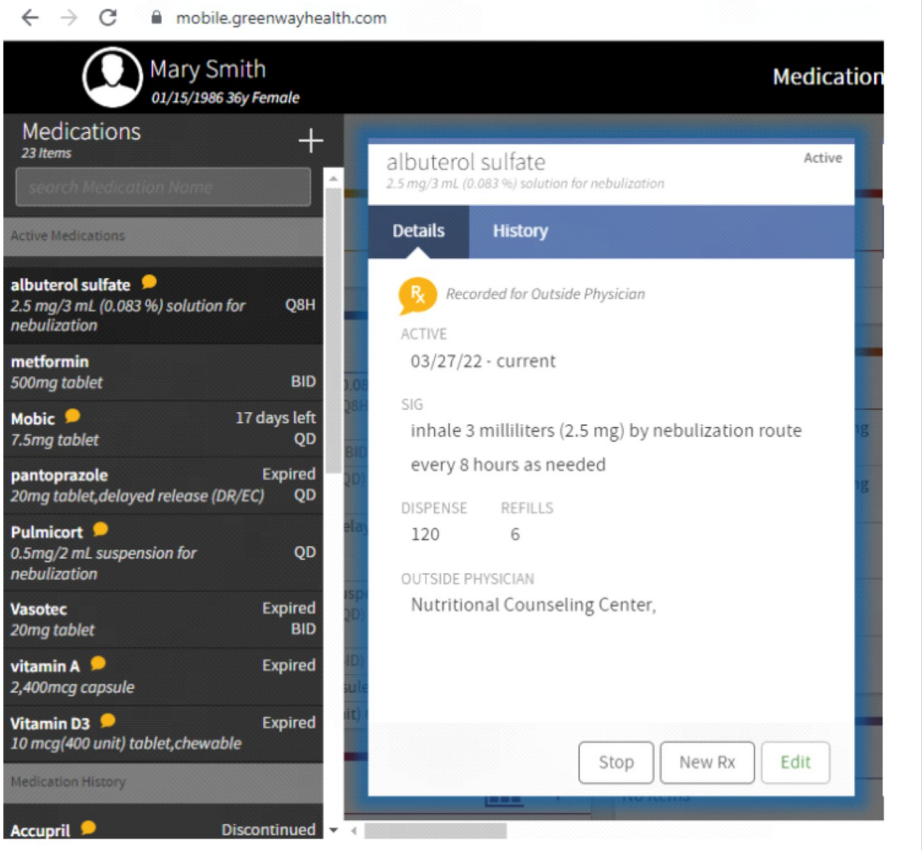

*Figure 15. Medication detail panel with the Stop button highlighted.*

1. Select the reason for discontinuing the medication, then select **Discontinue** to confirm.

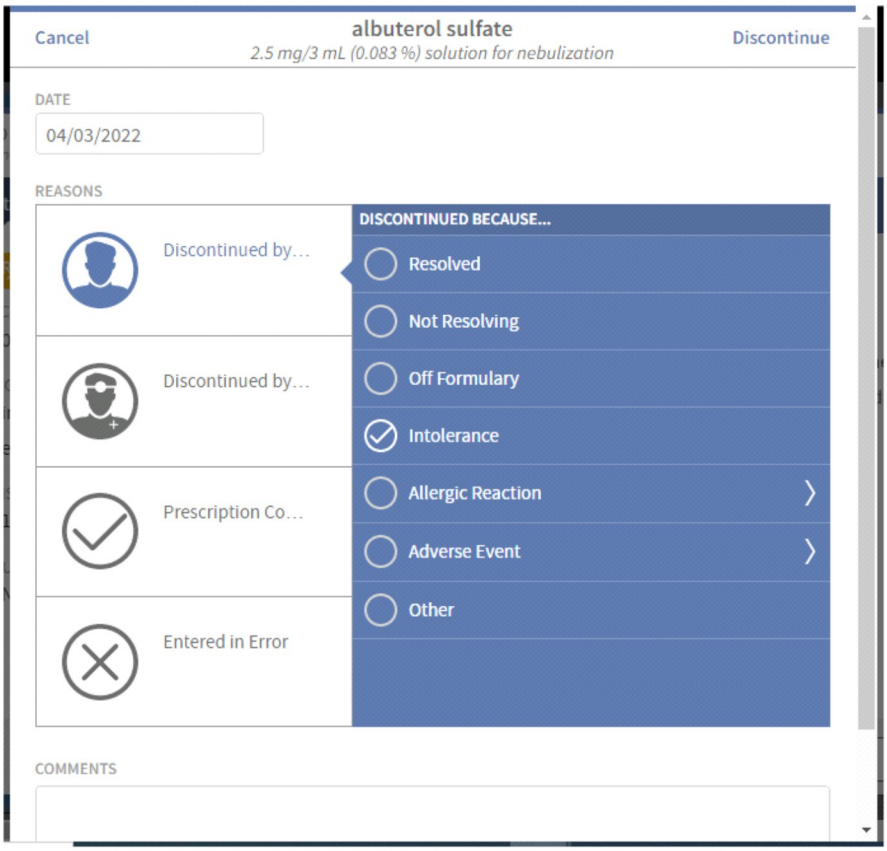

*Figure 16. Discontinue dialog with reason options and a Discontinue confirmation.*

**Result:** The medication moves to the patient's discontinued medication list and no longer appears as active.

## Related information

- To review a patient's full medication history, open the Medication tab and select History.
- To print a medication summary for the patient, select Export from the Medication tab.
